Total put in service on July 1-----	50	101

The aggregate number of lamps in the city is, 1,234.

I would respectfully call your attention to the fact that the erection of gas lamps, as late as August of last year, was \$39 for corner lamps, and \$37 for for intermediate lamps. Through much more reasonable contracts, resulting from the investigations and exertions of the Committee on Gas Light and your gas officer, the owners of property receiving the benefits of this improvement were saved the considerable sum of \$1,243 50 upon one hundred and sixty-nine lamps, erected subsequent to the month of August.

The gas lamps this year are only costing \$30 for corner lamps, and \$28 for intermediates, a further reduction of fifty cents and one dollar upon the lowest figures that obtained during the year 1869.

I have, therefore, the pleasure of reporting to you that the saving over the figures of August, 1869, upon the aggregate number of new lamps shown in the above schedules, (which include two bracket lamps, with a consequent saving of \$24 for two posts,) is the large sum of \$2,007.

Respectfully submitted,

GEO. H. FLEMING, City Gas Inspector.

Which was referred to the Committee on Gas Light.

The City Clerk made the following report:

OFFICE OF CITY CLERK, }
